Muncie 4-Speed Transmissions Paul Cangialosi 2014-10-15 The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process.

Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

There's No Mistake in Sam Patch David Tinling 2000-12 The Industrial Revolution began in America in Pawtucket, Rhode Island at the Slater Mill in 1793 where water power was first harnessed for factory work , and where Sam Patch went to work as a child early in the 19th Century. Very little is known of the real man, except that he began leaping from the roof of the mill into the Blackstone River and after that there was no stopping him as he jumped from ships' masts, bridges, and over cataracts, including Niagara Falls. This novel places him at a time of early American expansion to the West, when the Erie Canal first opened, and imagines his life in the mills, his heroic dreams of wealth and fame, his love for a Native American woman, and his inexorable rush to an early and spectacular death.
