Global Corporate Finance Kenneth A Kim 2014-12-30 Global Corporate Finance, 2nd edition written by a son-father team introduces students and practitioners to those principles essential to the understanding of global financial problems and the policies that global business managers contend with. The objective of this book is to equip current and future business leaders with the tools they need to interpret the issues, to make sound global financial decisions, and to manage the wide variety of risks that modern businesses face in a competitive global environment. In line with its objective, the book stresses practical applications in a concise and straightforward manner, without a complex treatment of theoretical concepts. Instructors who want students to possess practical, job-oriented skills in international finance will find this unique text ideal for their needs. Suitable for both undergraduate- and graduate-level courses in international finances, this book is clearly the "go-to" book on one most important aspect of corporate finance. The revised, 2nd edition offers updates to the chapters, answers to some end-of-chapter problems, and a number of practical case-studies. It also comes with a complete set of online ancillary materials, including an Instructor's Manual, a test bank of 500 multiple-choice questions, two sets of PowerPoint lecture slides, and separate, detailed lecture notes. The ancillary materials are available upon request for instructors who adopt this book as a course text.

Institutional Structure of Financial Regulation Robin Hui Huang 2014-06-20 In light of on-going global financial crises, the institutional structure of financial regulation is currently a subject of significant academic and practical interest. The financial crisis has called into question the adequacy of financial regulation at the national and supranational levels, and has instigated financial regulatory reforms in major markets overseas. This has included the enactment of the Dodd-Frank Act in the US, and the programme to split the Financial Services Authority in the UK. This book examines the institutional structure reform of financial regulation from a comparative perspective, exploring both fundamental theories and international experiences. The book explores the three main institutional structures of financial regulation in the world; the sectors-based model, adopted in the US, Mainland China and Hong Kong; the twin-peaks model with Australia and the Netherlands as its pioneers; and the single-regulator model as represented by the former Financial Services Authority in the UK and the Financial Services Agency in Japan. The book contains contributions from renowned experts in the field of financial regulation including Douglas Arner, Jeffrey Carmichael, Robin Hui Huang, Dirk Schoenmaker, and Michael Taylor, and will be of interest to students and researchers of banking and finance law, and comparative economics.

International Corporate Finance J. Ashok Robin 2010-01-21 With the ongoing global economic crisis still taking full effect on today's society, International Corporate Finance 1e brings a fresh approach and perspective on present events. This text focuses on a key player in this financial world: multinational corporations (MNC). By applying general financial concepts and procedures, it explains the conduct of financial management in MNCs. Because most corporations are either directly or indirectly affected by multinational entities and have a global exposure, a study of MNC financial management has broad applicability. This new text takes a quantitative approach with an emphasis on excel spreadsheets and current

examples.

Connect John Browne 2015-09-10 The Sunday Times Top Ten Bestseller. Drawing on the experience of John Browne, former CEO of BP, and the insight of two McKinsey experts, Connect articulates and explores the recurring rift between big business and society, offering a practical manifesto for reconciliation. This timely and important book features candid interviews with global leaders at the heart of this debate, from Facebook's Sheryl Sandberg and Goldman Sachs' CEO Lloyd Blankfein to Tony Blair and Tim Berners-Lee, inventor of the World Wide Web. Connect shows how companies and executives can enhance their performance by engaging radically with the world around them.

Contemporary International Business in the Asia-Pacific Region Alain Verbeke 2019-04-30 The increasing dominance of the Asia-Pacific region as a source of international business growth has created a dynamic and complex business environment. For this reason, a sound understanding of regional economies, communities and operational challenges is critical for any international business manager working in a global context. With an emphasis on 'doing business in Asia', Contemporary International Business in the Asia-Pacific Region addresses topics that are driving international business today. Providing content and research that is accessible to local and international students, this text introduces core business concepts and comprehensively covers a range of key areas, including trade and economic development, dimensions of culture, business planning and strategy development, research and marketing, and employee development in cross-cultural contexts. Written by authors with industry experience and academic expertise, Contemporary International Business in the Asia-Pacific Region is an essential resource for students of business and management.

The Rating Agencies and Their Credit Ratings Herwig Langohr 2010-04-01 Credit rating agencies play a critical role in capital markets, guiding the asset allocation of institutional investors as private capital moves freely around the world in search of the best trade-off between risk and return. However, they have also been strongly criticised for failing to spot the Asian crisis in the early 1990s, the Enron, WorldCom and Parmalat collapses in the early 2000s and finally for their ratings of subprime-related structured finance instruments and their role in the current financial crisis. This book is a guide to ratings, the ratings industry and the mechanics and economics of obtaining a rating. It sheds light on the role that the agencies play in the international financial markets. It avoids the sensationalist approach often associated with studies of rating scandals and the financial crisis, and instead provides an objective and critical analysis of the business of ratings. The book will be of practical use to any individual who has to deal with ratings and the ratings industry in their day-to-day job. Reviews "Rating agencies fulfil an important role in the capital markets, but given their power, they are frequently the object of criticism. Some of it is justified but most of it portrays a lack of understanding of

their business. In their book *The Rating Agencies and their Credit Ratings*, Herwig and Patricia Langohr provide an excellent economic background to the role of rating agencies and also a thorough understanding of their business and the problems they face. I recommend this book to all those who have an interest in this somewhat arcane but extremely important area." -Robin Monro-Davies, Former CEO, Fitch Ratings. "At a time of unprecedented public and political scrutiny of the effectiveness and indeed the basic business model of the Credit Rating industry, and heightened concerns regarding the transparency and accountability of the leading agencies, this book provides a commendably comprehensive overview, and should provide invaluable assistance in the ongoing debate." -Rupert Atkinson, Managing Director, Head of Credit Advisory Group, Morgan Stanley and member of the SIFMA Rating Agency Task Force "The Langohrs have provided useful information in a field where one frequently finds only opinions or misconceptions. They supply a firm base from which to understand changes now underway. A well-read copy of this monograph should be close to the desk of every investor, issuer and financial regulator, legislator or commentator." -John Grout, Policy and Technical Director, The Association of Corporate Treasurers

Trade Credit and Financing Instruments Lucia Gibilaro 2018-12-18 This book offers managers a complete analysis of the various facets of commercial credit and presents an analysis of the various types of markets, instruments, and risks associated with trade credit in supply chains across the globe. Trade credit is extensively used in both domestic and international commercial transactions. Although it clearly supports growth, its significance is even greater for developed countries, where the market has recovered remarkably since the global financial crisis. The number and heterogeneity of motivations to trade credit justify the variability observed in the data on global trading, and the role of trade credit has become crucial in supply chain coordination. A range of diverse trade credit finance solutions are available and include products and services offered by financial intermediaries and market products, highlighting a very interesting set of intermediate solutions that have emerged as a result of new technologies utilized in financial services. For financiers trade credit is an attractive option, but an in-depth evaluation of the possibility of losses forms the basis of a deep understating of numerous sources that can create credit risk (default and dilution risk). This book offers managers a complete analysis of the various facets of commercial credit and presents an analysis of the various types of markets, instruments, and risks associated with trade credit in supply chains across the globe.

Plunkett's Banking, Mortgages and Credit Industry Almanac 2008 Jack W. Plunkett 2007-11 The lending industry is comprised of a wide variety of sectors, such as banking, credit cards, mortgages, leasing and consumer finance. Many of these sectors have interconnections and synergies. In addition, a large number of related services and technologies have a major influence on the lending and credit business. These services include e-commerce, credit risk analysis, call centers and information technologies. Rapid changes have taken place in lending in recent years. For example, large amounts of business and consumer debt are now syndicated or securitized. Meanwhile, non-bank firms, such as GE, have become immense competitors in the lending arena, and international acquisitions are shaping up the globalized banking industry of the near future. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a banking, credit and mortgages market research and business intelligence tool-- everything you need to know about the business of banking, credit cards, mortgages and lending, including: Money center banks; Regional banks; Savings associations; Globalization of the banking and lending industries, including our profiles of nearly 350 of the world's leading international banking firms; Mortgage banking and brokerage; Home equity loans; Credit cards; Lending and other services provided by non-bank enterprises; Significant trends in banking and lending technologies; Risk analysis, payment processing, call centers and other support services; Online banking trends; ATM trends and technologies; Banking industry software.

Finance and the Good Society Robert J. Shiller 2013-04-21 Nobel Prize-winning economist explains why we need to reclaim finance for the common good The reputation of the financial industry could hardly be worse than it is today in the painful aftermath of the 2008 financial crisis. New York Times best-selling economist Robert Shiller is no apologist for the sins of finance—he is probably the only person to have predicted both the stock market bubble of 2000 and the real estate bubble that led up to the subprime mortgage meltdown. But in this important and timely book, Shiller argues that, rather than condemning finance, we need to reclaim it for the common good. He makes a powerful case for recognizing that finance, far from being a parasite on society, is one of the most powerful tools we have for solving our common problems and increasing the general well-being. We need more financial innovation—not less—and finance should play a larger role in helping society achieve its goals. Challenging the public and its leaders to rethink finance and its role in society, Shiller argues that finance should be defined not merely as the manipulation of money or the management of risk but as the stewardship of society's assets. He explains how people in financial careers—from CEO, investment manager, and banker to insurer, lawyer, and regulator—can and do manage, protect, and increase these assets. He describes how finance has historically contributed to the good of society through inventions such as insurance, mortgages, savings accounts, and pensions, and argues that we need to envision new ways to rechannel financial creativity to benefit society as a whole. Ultimately, Shiller shows how society can once again harness the power of finance for the greater good.

The Stress Test Every Business Needs Jeffrey R. Greene 2018-09-05 Future-proof your business today for
stronger performance tomorrow *The Stress Test Every Business Needs: A Capital Agenda for Confidently
Facing Digital Disruption, Difficult Investors, Recessions and Geopolitical Threats* provides a comprehensive
approach to creating value and flexibility in an increasingly volatile business environment that presents both
great risks and opportunities every day. The authors extend the banking "stress test" concept to a company's
Capital Agenda – how executives manage capital, execute transactions and apply corporate finance tools to
strategic and operational decisions. Having a static Capital Agenda, however appropriate for your current
market position, is not enough in today's uncertain world. Long-term success comes from building resilience
into each element and in the way those elements interact. The book uses a broader definition of business
stress that includes traditional macroeconomic and geopolitical risks, as well as technological disruption,
hostile takeovers and activist shareholders. Companies that make poor strategic decisions or underperform
operationally will likely find themselves facing great stress. And that stress is symmetric; threats come from
downside risks and from missed opportunities. The chapters address the how and why of essential issues
such as: Formulating corporate strategy in a digital world Pre-empting activist shareholders Restoring
distressed companies to operational and financial health Ensuring effective collaboration among strategy,
finance and operations Getting the most out of your advisors Proactively managing intrinsic value Rigorously
allocating capital across the enterprise Acquiring and divesting for optimum value Syncing financing decisions
with business strategy and capital market conditions Incorporating tax planning throughout the Capital Agenda
Liberating excess cash with leading working capital management practices Aligning strategic goals and
metrics to reach your company's full potential Companies that develop strategy and set operational priorities
with a balanced Capital Agenda are best positioned to control their own destiny. *The Stress Test Every
Business Needs* provides a roadmap to future-proof your business today for stronger performance tomorrow.

World War II in Contemporary German and Dutch Fiction Jan Lensen 2021-03-04 World War II in
Contemporary German and Dutch Fiction: The Generation of Meta-Memory offers a comparative study of the
construction of World War II memory in contemporary German, Flemish, and Dutch literature. More
specifically, it investigates in what ways the large temporal distance to the historical events has impacted how
literary writers from these three literatures have negotiated its meaning and form during the last decades. To
that end, this book offers analyses of nine novels that demonstrate a pronounced reflexivity on the conditions
of contemporary remembering. Rather than a dig for historical truth or a struggle with historical trauma, these
novels reflect on the transmission, the narrative shapes, the formation processes, and the functions of World
War II memory today, while asserting a self-conscious and often irreverent approach toward established
mnemonic routines, practices, and rules. As the analyses show, this approach is equally articulated through
the novels' poetics, which are marked by a large formal diversity and a playfulness that highlights mnemonic
agency, a posttraumatic positioning, and the ascendancy of the literary over the historiographical. Based on
these findings, this book proposes the emergence of a new paradigm within the postwar cultural assessment
of World War II: the generation of meta-memory.
