The Commissariat of Enlightenment Ken Kalfus 2009-02-24 Russia, 1910. Leo Tolstoy lies dying in Astapovo, a remote railway station. Members of the press from around the world have descended upon this sleepy hamlet to record his passing for a public suddenly ravenous for celebrity news. They have been joined by a film company whose cinematographer, Nikolai Gribshin, is capturing the extraordinary scene and learning how to wield his camera as a political tool. At this historic moment he comes across two men -- the scientist, Professor Vorobev, and the revolutionist, Joseph Stalin -- who have radical, mysterious plans for the future. Soon they will accompany him on a long, cold march through an era of brutality and absurdity. The Commissariat of Enlightenment is a mesmerizing novel of ideas that brilliantly links the tragedy and comedy of the Russian Revolution with the global empire of images that occupies our imaginations today.

The Origins of Ecological Economics Kozo Mayumi 2002-09-11 Nicholas Georgescu-Roegen deserves to be called the father of ecological economics. This book connects Georgescu-Roegen's earlier work such

as consumer choice theory and a critique of Leontief's dynamic model, with his later ambitious attempt to reformulate the economic process as 'bioeconomics', a theoretical alternative to neoclassical economics.

The Observing Eye Thomas Freller 2013-06-14 The French artist Jean

Pierre Louis Laurent Houel is rightly described as master of the 'vedutismo itinerante'. Art historians have acknowledged his important contributions to the development of 18th-century landscape painting. Volume four of his *magnus opus*, the *Voyage pittoresque des iles de Sicile, de Malte et de Lipari ...*, contributes substantially to our knowledge about the state of locations and monuments during his two visits to Malta and Gozo in 1770 and 1777. This new book also includes more sketches and reproductions of the original gouache paintings related to these islands which are now preserved in the Hermitage in St Petersburg. The qualities of these gouaches and plates, especially his neo-classical rigour and verism, make his work to a very important source of documentation for the archaeological and classical heritage of Malta and Gozo. Except the sketches, watercolours, and works on oil on canvas by his direct contemporary Louis Ducros, no other artist except for Houel has carried out such a number of first quality depiction of Malta's landscape, archaeological sites, architecture, and country folk. The accompanying text makes clear Houel's profound knowledge - at least by the standards of his times - of the history, geographical structure, and folklore of the Maltese archipelago.

Homo stupidens Piero Calzona

2014-05-14 Siamo sicuri che Homo sia sapiens? Siamo sicuri che le religioni abbiano un'utilità per l'umanità? Per rispondere a queste due domande l'Autore ha dovuto dedicare tredici anni di ricerca serrata attraverso la lettura di circa cinquecento libri di varie discipline. L'antropologia, la paleontologia, l'etnologia, la biologia evolutiva, la microbiologia, la genetica e tante altre discipline relative all'evoluzionismo gli hanno dato le risposte che cercava. In questa ricerca storico-antropologica l'Autore apre nuovi scenari sulla natura dell'uomo e sulle origini della religione, scenari che evidenziano le catastrofi causate dall'uomo e che ci fanno presagire un futuro incerto per la specie Homo.

The 5 Biological Laws Andrea Taddei
2013-09-02 The 5 Biological Laws discovered by Dr. Hamer, they represent a new key of reading and understanding of all the defined processes called pathological. This book, in particular, deals in a very in-depth way the conflicts regarding the inherent conflicts of devaluation of the bones, the muscles and the articulations. A somatic map of reference, with which it is possible to go back in a precise and verifiable way to the bony and muscular pains, is illustrated. Furthermore, they are explained from the point of view of the 5 Biological Laws, most common and diffuse pathologies regarding the osteo-

muscular system like: the arthritis, the arthrosis, the osteoporosis, the scoliosis, the herniated disc, the fibromyalgia, the rheumatoid arthritis and the valgus big toe. The book is composed by 2 sections: a first one, from the first to the tenth chapter, illustrates and explains the 5 biological laws, their meaning and what they involve; while from the eleventh to fifteenth chapter the conflicts, concerning the tissues resulted from the mesoderm, bones, muscles and articulations, are dealt. The book does not want to supply only a "prescription pad" of the map of the muscular, bony and articular pains, but it wants to make the reader understand the reason why, how, when and for how long the pains of the muscle-skeletal apparatus last in relation to the personal background. www.5biologicalallaws.com

Cancer Can Be Cured! Father Romano Zago Ofm 2008-11-01 Father Romano Zago, a Franciscan Friar and scholar, wrote the book *Cancer Can Be Cured* to reveal to the world an all natural Brazilian Recipe that contains the juice made from the whole leaf plant of Aloe Arborescens and honey that has been shown to rapidly restore the body's health so it heals itself of all types of cancer. The book tells how it was while administering to the poor in the shantytown of Rio Grande dol Sul , Brazil that he and the provincial Father Arno Reckziegel, witnessed the healing of simple people of cancer who used this recipe. Later, when he had assignments in Israel and Italy where this aloe species grows naturally he continued to see great success in the chronically ill being cured when he recommended they use this recipe. This inspired for him to spend the next 20 years in researching the science behind this aloe species and the publication of that research in this book along with his numerous

first hand anecdotes of cancer healing by those using the Brazilian juice recipe. Chapters include information on how to prepare the recipe using the three ingredients of whole leaf Aloe arborescens juice, honey and a small amount of distillate (1%); how to take the preparation; questions and answers on everything from how to pick the aloe leaves, why each of the three ingredients is important in the recipe, the types of cancer that have been cured using the recipe, other diseases and health problems the recipe has shown to be beneficial in helping the human body solve; the internationalization of the recipe on five continents; anecdotal stories of some body healings; the composition of Aloe; and Aloe and Aids. There has been much publicized scientific research and literature on the synergistic benefits of the 300 phytotherapeutic biochemical and nutrient constituents of Aloe vera to aid the body's defenses to enhance the immune system and protect against diseases. However, this is the first book to reveal the little known potency

Ciao! Come Stai? Giovanni Lollo 2008-07-14 Ciao, se ti fossi appena svegliato da un lunghissimo letargo e aprissi gli occhi, guardandoti allo specchio, quale sarebbe la prima domanda che ti porresti? Ti assicuro che non sarebbe: Chi è quello nello specchio? Questa sarebbe la seconda. La prima domanda che ti faresti ancora prima di guardarti nello specchio, ancora prima di formulare

un pensiero sensato, sarebbe: Come sto? E' la domanda più importante che potremo mai rivolgere a noi stessi. E' la domanda che ci facciamo appena ci rendiamo conto di essere vivi. L'abbiamo espressa a noi stessi alla nascita, quando ci hanno tagliato il cordone ombelicale e la risposta che abbiamo dato allora ha determinato la vita che abbiamo vissuto finora. Ora sei di fronte ad una importante scelta, puoi rifarti la domanda con una consapevolezza nuova. Ora puoi decidere liberamente, consapevole di quanto importante sia la domanda. Ciao! Come stai?

The Basic Code of the Universe

Massimo Citro 2011-07-26 Explains the universal information code connecting every person, plant, animal, and mineral and its applications in science, health care, and cosmic unity • Examines research on consciousness, quantum physics, animal and plant intelligence, emotional fields, Kirlian photography, and the effects of thoughts, emotions, and music on water • Reveals the connections between the work of Ervin Laszlo on the Akashic field, Rupert Sheldrake on morphogenetic fields, Richard Gerber on vibrational medicine, and Masaru Emoto on the memory of water DNA dictates the physical features of an organism. But what dictates how something grows--from the division of cells in a human being to the fractal patterns of a crystal? Massimo Citro reveals that behind the complex world of Nature lies a basic code, a universal information field--also known as the Akashic field, which records all that was, is, and will be--that directs not only physical development and behavior but also energetic communication and interactions among all living and non-living things. The author examines research on consciousness, quantum physics, animal and plant

intelligence, the power of intention, emotional fields, Kirlian photography, and the effects of thoughts, emotions, and music on water. Linking the work of Ervin Laszlo on the Akashic field, Rupert Sheldrake on morphogenetic fields, Richard Gerber on vibrational medicine, and Masaru Emoto on the memory of water, Citro shows how the universal information field connects every person, plant, animal, and mineral--a concept long known by shamans and expounded by perennial wisdom. Putting this science of the invisible to practical use, he explains his revolutionary system of vibrational medicine, known as TFF, which uses the information field to obtain the benefits of natural substances and medications in their "pure" informational form, offering side-effect-free remedies for health and well-being.

historical and philosophical foundation of this practice. Ilza Veith provides an extensive introduction to her monumental translation of this classic work, which is written in the form of a dialogue in which the emperor seeks information from his minister Ch-I Po on all questions of health and the art of healing.

L'onda capovolta Donato Merico 2017-05-09 Esiste un modo per salvare se stessi? Per l'autore certamente sì ma solo attraverso un percorso che

richiede coraggio, umiltà e, soprattutto, forza per affrontare il dolore che scaturirà da questo viaggio a ritroso nel tempo: dal ricordo emozionale della vita intrauterina sino, attraverso il trauma del parto, ai primi mesi di vita dei bambini che si è stati. Il bambino che non è stato "ascoltato" nei suoi bisogni, poiché la madre e in seguito le altre figure di riferimento non hanno potuto, voluto o saputo farlo, ne ricava una profonda frustrazione, una ferita narcisistica che lo renderà un adulto incapace di "ascoltarsi" e di comprendere le proprie sensazioni, fino a provare una sorta di "distacco da se stesso" causa di varie forme di malessere fisico, psichico o relazionale, che lo porterà a cercare qualsiasi cosa "fuori da sé", come: il super lavoro, i doveri famigliari, gli svaghi fatui, la religione, la politica, le dipendenze di vario tipo, per tenere a bada l'"angoscia esistenziale".

Medicine Upside Down Giorgio Mambretti 2013-03-01 Dr Hamer is a highly controversial figure: his patients love him, yet other doctors want to block him, and meanwhile he gathers acknowledgements, but at the same time he is put on trial as well. Many believe that most of the opposition against him is because his theories -- and above all his long list of patients who have been healed -- go completely against established medicine... How can it be that diseases like cancer can simply be an attempt of the brain to fix (which means to heal) some emotional traumas? And that identifying such traumas and solving them can equate to healing the body? This is the only book available in Italy which is really up-to-date and comprehensive, very clear and supported by some brilliant cartoons: all these qualities have turned it into a real

best seller. At long last a book on Dr Hamers new Germanic Medicine that is both really easy-to-read and comprehensive. Approach these controversial, yet fascinating theories with objectivity and open-mindedness.

On Being Human Daisaku Ikeda 2002

He is captured in Milan after the German surrender and is spared execution by his captors, boys of his own age.

The Opening of the Third Eye Dr. Douglas M. Baker 2014-03-02 The Opening of the Third Eye: The human brain is a priceless computer lying perfectly maintained but almost silent! None of us uses the full potential of this amazing instrument, yet we all possess a secret 'trigger' for activating its mechanism. Called 'the Third Eye' in occult language, this 'trigger' can release a vortex of psychic energy for the extension of awareness in new dimensions, for speeding up or slowing down time as experienced on our planet, and achieving one hundred per cent personality integration. Dr. Baker reveals that the Third Eye derives its power from the pineal, pituitary and carotid glands, allied to 'whirlwinds' of energy known as 'chakras' or force centres. There are seven of these centres in the human body, their physical location being the base of the spine, the solar plexus, the spleen, the heart, the throat, the brow, and the top of the

head. Five safe techniques for arousing the Third Eye are provided. They have been practised by the author 'without hazard and with many rewards for over forty years.' In our present condition we can only observe the outer surface of the planet, manifesting in gaseous, liquid and solid form. We are completely unaware of the subtler states of matter beneath these outward appearances. But the Third Eye reveals all underlying structures. 'This means that one could observe the termites in apparently solid wooden paneling; or, more constructively, man's inner organs could be observed and all traces of disease in them immediately recognised, with consequent enormous benefits to medical progress.'

Bodybuilding George Touliatos 2018-08-06 The title of this book, 'the good, the bad & the ugly', briefly explains the deeper aspect of what iron sport is about and represents. The good refers to the flashy and glamorous side of it. Tanned, oiled, shaved, ripped, veiny and muscular bodies posing on stage. Supreme physiques that reveal this majestic-but misunderstood sport. The bad, encloses all the sacrifices as part of this discipline life style. Dedication, devotion, tunnel vision that basically build a strong character and will power. The ugly side of bodybuilding is hardly revealed, simply because truth hurts and shocks. Drug abuse leads to a plethora of side effects and diseases, making bodybuilding a potentially dangerous life style. Only a physician who walked his talk (as a former competitive bodybuilder), could say it better than anyone else, with reality.

Commentaries On Living 2 J

Krishnamurti 2012-08-08 In this series of commentaries J.

Krishnamurti, one of the great thinkers of our time, touches upon many human problems-our hopes, our fears, our illusions, our beliefs, our prejudices-and in the simplest language seems to pierce to their roots."The sheer simplicity is breathtaking. The reader is given, in one paragraph, often in one sentence, enough to keep him exploring, questioning, thinking for days." - Anne Morrow Lindbergh."The insight,

spiritual and poetic, of these commentaries is as simply expressed as it is searching in its demand."- Times Literary Supplement (London). "Krishnamurti is no other than he seems, a free man, one of the first quality, growing older as diamonds do but the gem-like flame not dating, and alive in these Commentaries. It is a treasure."- Francis Hackett, The New Republic.
