Renewable Energy Sources and Climate Change Mitigation Ottmar Edenhofer 2012 This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the environmental and social consequences associated with the deployment of these technologies and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector and academic researchers.

The Symposium Xenophon 2021-12-24 The Symposium Xenophon - Xenophon the Athenian was born 431 B.C. He was a pupil of Socrates. He marched with the Spartans, and was exiled from Athens. Sparta gave him land and property in Scillus, where he lived for many years before having to move once more, to settle in Corinth. He died in 354 B.C. The Symposium records the discussion of Socrates and company at a dinner given by Callias for the youth Autolycus. Dakyns believed that Plato knew of this work, and that it influenced him to some degree when he wrote his own "Symposium." Entertainment at the dinner is provided by the Syracusan and his three performers. Their feats of skill thrill the attendants and serve as points of conversation throughout the dialogue. Much of the discussion centers on what each guest is most proud of. All their answers are playful or paradoxical: Socrates, for one, prides himself on his knowledge of the art of match-making. Xenophon consciously and carefully chooses his characters in this dialogue. Those who attend the symposium (422 B.C.) are all gentlemen (kaloikagathoi) and are united by their status. Later, however, their disagreements will lead them to conflict. The contemporary readers of the Symposium would have been familiar with each characters history, and would have recognized the ironic circumstances of the dialogue.

Socrates: The main character in the work. Socrates drives and controls the conversation at the symposium. He values the craft of match-making because a good match-maker can arrange suitable marriages and friendship between cities. Xenophon begins the dialogue by saying that he thinks the deeds of men not only in their serious times, but also in their playful times, are worth mentioning. He expresses his desire to explain the deeds on such a particular occasion, at which he himself was present (Xenophon's presence at the symposium is doubted, since he would have been too young to attend at the time). After they finished eating, an entertainer from Syracuse, who had been invited by Kallias, came with his entourage of performers including a girl good at flute playing, a girl who danced spectacularly, and a very pretty boy who played the cithara and danced (2.1). The flute player and the boy play their instruments together in a performance which pleases Socrates. He praises Kallias for the dinner and the entertainment which he provided. Kallias then suggests that the party should enjoy some perfumes, but Socrates refused, saying that men ought to smell of gymnastic exercise and the men with whom they associate. This leads to a discussion of the teachability of virtue (2.6), which Socrates suggests they drop because it is controversial. The dancing girl is about to perform with the flutist (2.7).

Riding the Roller Coaster Charles K. Hyde 2003-02-01 From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler—its products, people, and performance over time—with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders—including Chrysler himself and Lee Iacocca—emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

Unbroken Laura Hillenbrand 2014-07-29 #1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • Look for special features inside. Join the Random House Reader's Circle for author chats and more. In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will.
