Ancient Roots, New Shoots Bertus Haverkort 2003-03 Knowledge has become a buzzword of the age. In the North, people talk of the knowledge-based economy; in the South, the World Bank now defines itself as a knowledge institution. But the question is: whose knowledge? This collection of general reflections and practical experiences illustrates the inappropriateness of a Western model in many local settings, and the positive value of non-Western systems of knowledge, values and ways of doing things. It shows how traditional knowledge is being recognised in the botanical and agricultural sectors - local medicinal herbs, local seed varieties and animal breeds, local methods of pest control. The projects illustrate the notion of endogenous development, or development from within. They show how development can be based on locally available natural resources and local knowledge, values and leadership institutions; how development options can be locally determined; and how to retain the benefits of development within local areas and communities. Endogenous development is not a total solution, but complementary to ongoing modern technological and global economic processes. But the remarkable experiments described do show the rich benef

Intelligent Computing and Innovation on Data Science Sheng-Lung Peng 2020-05-14 This book covers both basic and high-level concepts relating to the intelligent computing paradigm and data sciences in the context of distributed computing, big data, data sciences, high-performance computing and Internet of Things. It is becoming increasingly important to develop adaptive, intelligent computing-centric, energy-aware, secure and privacy-aware systems in high-performance computing and IoT applications. In this context, the book serves as a useful guide for industry practitioners, and also offers beginners a comprehensive introduction to basic and advanced areas of intelligent computing. Further, it provides a platform for researchers, engineers, academics and industrial professionals around the globe to showcase their recent research concerning recent trends. Presenting novel ideas and stimulating interesting discussions, the book appeals to researchers and practitioners working in the field of information technology and computer science.

The Emergence of Modern Hinduism Richard S. Weiss 2019-08-06 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. The Emergence of Modern Hinduism argues for the importance of regional, vernacular innovation in processes of Hindu modernization. Scholars usually trace the emergence of modern Hinduism to cosmopolitan reform movements, producing accounts that overemphasize the centrality of elite religion and the influence of Western ideas and models. In this study, the author considers religious change on the margins of colonialism by looking at an important local figure, the Tamil Shaiva poet and mystic Ramalinga Swami (1823-1874). Weiss narrates a history of Hindu modernization that demonstrates the transformative role of Hindu ideas, models, and institutions, making this text essential for scholarly audiences of South Asian history, religious studies, Hindu studies, and South Asian studies.

Swami Vivekananda: A Historical Review Dr. R. C. Majumdar 2016-06-13 Among the many biographies of Swami Vivekananda, the present book has a place of special importance, as it is a historical review of the great life and contribution of the Swami by one whose scrutiny of facts, analysis of events and unbiased search for truth won him a place of honour among the eminent historians of the twentieth century. In this

book published by Advaita Ashrama, a publication house of Ramakrishna Math, Belur Math, India, the author has deliberately avoided discussions on mystic experiences and philosophical ideas of the Swami and has portrayed him purely on historical lines.

Agricultural Wastes Geoffrey S. Ashworth 2009 Agricultural waste, which includes both natural (organic) and non-natural wastes, is a general term used to describe waste produced on a farm through various farming activities. These activities can include but are not limited to dairy farming, horticulture, seed growing, livestock breeding, grazing land, market gardens, nursery plots, and even woodlands. Agricultural and food industry residues, refuse and wastes constitute a significant proportion of world wide agricultural productivity. It has variously been estimated that these wastes can account for over 30% of world wide agricultural productivity. The boundaries to accommodate agricultural waste derived from animal agriculture and farming activities are identified in this book. Examples will be provided of how animal agriculture and various practices adopted at farm-scale impact on the environment. When discharged to the environment, agricultural wastes can be both beneficial and detrimental to living matter and the book will therefore also address the pros and cons of waste derived from animal agriculture in today's environment. Given agricultural wastes are not restricted to a particular location, but rather are distributed widely, their effect on natural resources such as surface and ground waters, soil and crops, as well as human health, will also be addressed.

Handbook of Anticancer Drugs from Marine Origin Se-Kwon Kim 2014-11-27 This timely desk reference focuses on marine-derived bioactive substances which have biological, medical and industrial applications. The medicinal value of these marine natural products are assessed and discussed. Their function as a new and important resource in novel, anticancer drug discovery research is also presented in international contributions from several research groups. For example, the potential role of Spongistatin, Apratoxin A, Eribulin mesylate, phlorotannins, fucoidan, as anticancer agents is explained. The mechanism of action of bioactive compounds present in marine algae, bacteria, fungus, sponges, seaweeds and other marine animals and plants are illustrated via several mechanisms. In addition, this handbook lists various compounds that are active candidates in chemoprevention and their target actions. The handbook also places into context the demand for anticancer nutraceuticals and their use as potential anti-cancer pharmaceuticals and medicines. This study of advanced and future types of natural compounds from marine sources is written to facilitate the understanding of Biotechnology and its application to marine natural product drug discovery research.

Advanced Computational and Communication Paradigms Siddhartha Bhattacharyya 2018-06-07 The book titled Advanced Computational and Communication Paradigms: Proceedings of International Conference on ICACCP 2017, Volume 1 presents refereed high-quality papers of the First International Conference on Advanced Computational and Communication Paradigms (ICACCP 2017) organized by the Department of Computer Science and Engineering, Sikkim Manipal Institute of Technology, held from 8- 10 September 2017. Global Indian Diasporas Gijbert Oonk 2007 Global Indian Diasporas discusses the relationship between South Asian emigrants and their homeland, the reproduction of Indian culture abroad, and the role of the Indian state in reconnecting emigrants to India. Focusing on the limits of the diaspora concept, rather than its possibilities, this volume presents new historical and anthropological research on South Asian emigrants worldwide. From a comparative perspective, examples of South Asian emigrants in Suriname, Mauritius, East Africa, Canada, and the United Kingdom are deployed in order to show that in each of these regions there are South Asian emigrants who do not fit into the Indian diaspora concept—raising questions about the effectiveness of the diaspora as an academic and sociological index, and presenting new and controversial insights in diaspora issues.

Sathyam Sivam Sundaram N. Kasturi 2014-04-10 This second volume of "Sathyam Sivam Sundaram" narrates the life history of Bhagawan Sri Sathya Sai Baba, covering the period 1962 to 1968, when He was at the age of 36 to 42 years, in Prof. N. Kasturi's inimitable, poetic style. Prof. N. Kasturi is the chosen biographer of Bhagawan, who lived with Swami and experienced the Divine Leelas, during these years and it is most appropriate to get this first-hand information from his writings for our benefit. Bhagawan's historic letter dated 25.05.1947, in His own handwriting declaring His task, vow, and mission is included in this volume. Many incidents and miracles that happened during this period with Bhagawan's grace are brought out in this volume most interestingly, along with many, appropriate photographs, which will form a garland for the living and loving Divinity, Bhagawan Sri Sathya Sai Baba. Prof. Kasturi gives a clarion call to all: "Come! Give me your hand. We shall go along, page after page, sharing the wonder and the wisdom, the awe and the mystery, the truth and the testimony, the glory and the grandeur, and the abundance of the peace."

Health and Safety Aspects of Food Processing Technologies Abdul Malik 2019-10-31 Food processing is expected to affect content, activity and bioavailability of nutrients; the health-promoting capacity of food products depends on their processing history. Traditional technologies, such as the use of antimicrobials and thermal processing, are efficient in increasing nutritional value to an extent, though they may not be effective at addressing food safety, particularly when it comes to maintaining the food's molecular structure. Modern food processing plants improve the quality of life for people with allergies, diabetics, and others who cannot consume some common food elements. Food processing can also add extra nutrients, such as vitamins. Processed foods are often less susceptible to early spoilage than fresh foods and are better suited for long-distance transportation from the source to the consumer. However, food processing can also decrease the nutritional value of foods and introduce hazards not encountered with naturally occurring products. Processed foods often include food additives, such as flavourings and texture-enhancing agents, which may have little or no nutritive value, and may in fact be unhealthy. This book deals with the subject of food processing in a unique way, providing an overview not only of current techniques in food processing and preservation (i.e., dairy, meat, cereal, vegetables, fruits and juice processing, etc.) but also the health and safety aspects: food technologies that improve nutritional quality of foods, functional foods, and nanotechnology in the food and agriculture industry. The text also looks into the future by defining current bottlenecks and future research goals. This work will serve as a ready reference for the subject matter to students and researchers alike.

Happiness Beyond Thought Gary Weber 2007-04 Praise for Happiness Beyond Thought "Husband, father, scientist, military officer, and senior executive in industry and academia, Gary Weber has led a full and successful worldly life. Throughout all of this, Gary has relentlessly pursued a path of practice and inquiry in order to understand life and achieve enlightenment. It is rare to find one who has reached this goal, and rarer still to find such a one who has been so immersed in worldly life. With this book, Gary has successfully integrated his profound realization with traditional non-dualistic teachings, as well as insights from Zen Buddhism and modern brain research, into a practical path that uses Yoga's time-tested practices of asana, pranayama, chanting and meditation to illumine a path to enlightenment for the modern reader." - Gary Kraftsow, author of Yoga for Wellness and Yoga for Transformation "Gary Weber offers a treasure chest of practices for the serious practitioner seeking liberation. On your own journey towards awakening, savor these simple, easy to follow practices culled from Weber's study with his primary teacher Ramana Maharshi, his on-going exploration of Zen meditation practice, and the life-enhancing results of his experiments on the laboratory floor of his yoga mat." -Amy Weintraub, author of Yoga for Depression

Bhagavad Gītā and Leadership Satinder Dhiman 2018-12-17 This book shows how the Bhagavad Gītā (part of the great Indian epic — the Mahābhārata) can be approached as a powerful tool for change management and as a catalyst for organizational transformation. It presents time-tested leadership strategies drawn from the Bhagavad Gītā that are relevant for today's leaders. This book focuses on how to harmonize the needs of the individual with the needs of society, and by extension, how to harmonize the needs of employees and the organization. It employs an inside-out leadership development approach based on Self-knowledge and Self-mastery, the two highly important areas for practicing effective Self-leadership. The Gītā is a non-sectarian spiritual text with a universal message for living a life of meaning, purpose, and contribution and for leading from our authentic self. It shows how to manage oneself, as a necessary prelude to leading others. Students and organizational leaders will learn to integrate leadership function more effectively into all aspects at the individual, team, and institutional level.

Ramana Maharshi and the Path of Self Knowledge Arthur Osborne 2013-07-08 Introduced to the West by Paul Brunton, Bhagavan Sri Ramana Maharshi (1879-1950) is widely hailed as the greatest Indian saint and sage in modern times, whose teachings continue to influence thousands around the world today. This intimate biography by his disciple Arthur Osborne interweaves the story of Ramana's life with his spiritual journey, from his awakening as a teenager to his later teachings and writings, offering a detailed account of a unique life. Osborne shares many of Ramana's lessons, including his emphasis on the importance of self-enquiry - that self-knowledge cannot be gained externally, but only through becoming aware of our own state of pure being. With his emphasis on the qualities of insight, simplicity and kindness, Ramana has much to offer us today.

M.K. Gandhi, Attorney at Law Charles R. DiSalvo 2013-11-15 "This book shows how Gandhi's early life in the law played a critical role in the subsequent evolution of his philosophy and theory of nonviolent civil disobedience. The author traces Gandhi's maturation from a tongue-tied novice to a competent professional, from civil rights lawyer to freedom fighter, finally integrating his principles of morality and spirituality into his political life"--Provided by publisher.

Fuzzy and Neutrosophic Analysis of Periyar's Views on Untouchability W. B. Vasantha Kandasamy 2005 For the first time, the social problem of untouchability, which is peculiar to India, is being studied mathematically. We have used Fuzzy Cognitive Maps and Neutrosophic Cognitive Maps to analyze the views of the revolutionary Periyar E. V. Ramasamy (17.09.1879 24.12.1973) who relentlessly worked for more than five decades to secure the rights of the oppressed people who were considered untouchables. This thought-provoking book will be of great interest to human rights activists, socio-scientists, historians, and above all, mathematicians. From UNESCO citation: Periyar, The Prophet of the New Age, The Socrates of South East Asia, Father of the Social reform Movement and Arch Enemy of Ignorance, Superstition, Meaningless Customs and Baseless Manners.

Functional Chitosan Sougata Jana 2020-03-05 Thanks to their unique properties, chitosan and chitosan-based materials have numerous applications in the field of biomedicine, especially in drug delivery. This book examines biomedical applications of functional chitosan, exploring the various functions and applications in the development of chitosan-based biomaterials. It also describes the chemical structure of chitosan and discusses the relationship between their structure and functions, providing a theoretical basis for the design of biomaterials. Lastly, it reviews chemically modified and composite materials of chitin and chitosan derivatives for biomedical applications, such as tissue engineering, nanomedicine, drug delivery, and gene delivery.
