book examines these issues, and assesses the state of both nations, as well as that of the contemporary novel.

Parish Church Treasures John Goodall

2015-10-08 Our parish churches constitute a living patrimony without precise European parallel. Their cultural riches are astonishing, not only for their quality and quantity, but also their diversity and interest. Fine art and architecture here combine unpredictably with the functional, the curious and the naïve, from prehistory to the present day, to form an unsung national museum

which presents its contents in an everyday setting without curators or formal displays. Because church treasures usually remain in the buildings they were created for, properly interpreted they tell from thousands of local perspectives the history of the nation, its people and their changing religious observance. John Goodall's weekly series in *Country Life* has celebrated particular objects in or around churches that are of outstanding artistic, social or historical importance, to underline both the intrinsic interest of parish churches and the insights that they and their contents offer into English history of every period. *Parish Church Treasures* incorporates and significantly expands this material to tell afresh the remarkable history of the parish church. It celebrates the special character of churches as places to visit whilst providing an authoritative and up-to-date history at a time when the use and upkeep of these buildings and the care of their contents is highly contentious.

*Sacred Space for the Missional Church* William R. McAlpine 2011-02-14 *Sacred Space for the Missional Church* examines the strong link between the theology and mission of the Church and the spaces in which and from which that theology and mission are lived out. The author demonstrates that the built environment is not incidental or even subservient to mission. Rather it is a key player in the fulfillment and the communication of that mission. The book begins

with a working definition of the missional church, underscoring the connection between God's mission (*missio Dei*) and the Church's mission. The reader is presented with historical and theological frameworks for sacred space, and reminded of the pivotal role of the built environment in the fulfillment of the mission of the Church. The design and construction of sacred spaces are shown to be fundamentally a theological exercise and not solely a matter of function, pragmatics and fiscal astuteness. The author questions the uncritical application of blanket statements such as "form must follow function," and challenges the conviction that it does not matter where worship occurs, only that it occurs. The book addresses genuine concerns such as legitimizing the cost of church buildings and concludes with practical suggestions and essential questions that must be considered in posturing the built environment within the missional praxis of the Church.

*The Beauty of Holiness* Louis P. Nelson 2009-06-01 Intermingling architectural, cultural, and religious history, Louis Nelson reads Anglican architecture and decorative arts as documents of eighteenth-century religious practice and belief. In *The Beauty of Holiness*, he tells the story of the Church of England in colonial South Carolina, revealing how the colony's Anglicans negotiated

the tensions between the persistence of seventeenth-century religious practice and the rising tide of Enlightenment thought and sentimentality. Nelson begins with a careful examination of the buildings, grave markers, and communion silver fashioned and used by early Anglicans. Turning to the religious functions of local churches, he uses these objects and artifacts to explore Anglican belief and practice in South Carolina. Chapters focus on the role of the senses in religious understanding, the practice of the sacraments, and the place of beauty, regularity, and order in eighteenth-century Anglicanism. The final section of the book considers the ways church architecture and material culture reinforced social and political hierarchies. Richly illustrated with more than 250 architectural images and photographs of religious objects, *The Beauty of Holiness* depends on exhaustive fieldwork to track changes in historical architecture. Nelson imaginatively reconstructs the history of the Church of England in colonial South Carolina and its role in public life, from its early years of ambivalent standing within the colony through the second wave of Anglicanism beginning in the early 1750s.

#### **Sacred Architecture in a Secular Age** Marie

Clausén 2016-02-26 Having won more than one recent poll as Britain's best-loved building, the appeal of Durham Cathedral appears abiding, which begs the question whether an iconic sacred

building can retain meaning and affective pertinence for contemporary, secular visitors. Using the example of Durham Cathedral, this book sets out to explore wherein the appeal of historic churches lies today and considers questions of how and why their preservation into a post-Christian era should be secured. By including feedback from visitors to the cathedral, and the author's own very personal account of the cathedral in the form of an ekphrasis, this work seeks to privilege an interpretation of architecture that is based on the individual experience rather than on more conventional narratives of architecture history and cultural heritage policy. Recognising the implication of our choice of narrative on the perceived value of historic churches is crucial when deliberating their future role. This book puts forth a compelling case for historical sacred architecture, suggesting that its loss - through imperceptive conservation practices as much as through neglect or demolition - would diminish us all, secularists, atheists and agnostics included.

2019-07-31 The fascinating variety of Scotland's church buildings is rarely appreciated. Many are hidden away in remote country areas, or in parts of towns and cities not often visited. Others are critical to the 'sense of place' that makes settlements recognised and loved. In this book, 184 churches still used for worship are illustrated with line drawings and photographs, with pithy texts drawing out where they fit into the fabric of Scotland, and into nearly a thousand years of church construction. Some are well known and widely loved; others will surprise and delight.

*Prayers in Stone* Paul Eli Ivey 1999 The classical revival style of architecture made famous by the 1893 World's Columbian Exposition in Chicago left its mark on one of the most sustained classical building movements in American architectural history: the Christian Science church building movement. By 1920 every major American city and many smaller towns contained

an example of this architecture, financed by the followers of Mary Baker Eddy, the church's founder. These buildings represented a new, burgeoning American institution that appealed to business people and to young men and women working to succeed. Characterized by middle-class congregations that in the early part of the century were over 75 percent women, Christian Science suggested radical civic reform solutions based on an idealistic and pragmatic individualism. It attracted criticism from traditional churches and from the medical establishment due to its rapid growth and to its reinstatement of primitive Christianity's lost elements of physical healing and moral regeneration. *Prayers in Stone* spins out the close connections between Christian Science church architecture and its social context. This architecture served as a focal point for debates over the possibilities for a new twentieth-century urban architecture that proponents believed would positively shape the behavior of citizens. Thus these buildings played a critical role in discussions concerning religious and secular architecture as major elements of religious and social reform. Drawing on a wide range of documentary evidence, including material from the archives of the Mother Church in Boston, Paul Ivey uses Christian Science architecture to explore the social implications of architectural styles and new building technologies, to illuminate class-based notions of civic reform

and beautification, and to investigate the use of architecture to bring about religious and social change. In addition, the book explores complex gender issues, including early attempts to define a professional space for women as Christian Science practitioners. Lavishly illustrated, *Prayers in Stone* focuses on four major city arenas of Christian Science building -- Boston, Chicago, New York, and the San Francisco Bay area -- to demonstrate the vital intersection of architecture and religion at the so-called margins of American society.

**Secular Steeples** 2nd edition Conrad Ostwalt  
2012-09-27 An exploration of secularization in America, this book provides students with an innovative way of understanding the relationship between religion and secular culture. In *Secular Steeples*, Conrad Ostwalt challenges long-held assumptions about the relationship between religion and culture and about the impact of secularization. Moving away from the idea that religion will diminish as secularization continues, Ostwalt identifies areas of popular culture where secular and sacred views and objectives interact

and enrich each other. The book demonstrates how religious institutions use the secular and popular media of television, movies, and music to make sacred teachings relevant. From megachurches to sports arenas, the Bible to Harry Potter, biker churches to virtual worship communities, Ostwalt demonstrates how religion persists across cultural forms, secular and sacred, with secular culture expressing religious messages and sometimes containing more authentic religious content than official religious teachings. An ideal text for anyone studying religion and popular culture, each chapter provides questions for discussion, a list of important terms and guided readings.

**The Architecture of Norman England** Eric Fernie

2002 This important addition to the literature is

the first overall study of the architecture of

Norman England since Sir Alfred Clapham's

English Romanesque Architecture after the

Conquest (1934). Eric Fernie, a recognized

authority on the subject, begins with an overview

of the architecture of the period, paying special

attention to the importance of the architectural

evidence for an understanding of the Norman

Conquest. The second part, the core of the book,

is an examination of the buildings defined by their

function, as castles, halls, and chamber blocks,

cathedrals, abbeys, and collegiate churches,

monastic buildings, parish churches, and palace

chapels. The third part is a reference guide to the

elements which make up the buildings, such as

apses, passages, vaults, galleries, and decorative

features, and the fourth offers an account of the

processes by which they were planned and

constructed. This book contains powerful new

ideas that will affect the way in which we look at

and analyze these buildings.

**Churches and the Crisis of Decline (Ministry in a**

**Secular Age Book #4)** Andrew Root 2022-03-01

Congregations often seek to combat the crisis of

decline by using innovation to produce new

resources. But leading practical theologian

Andrew Root shows that the church's crisis is not

in the loss of resources; it's in the loss of life--and

that life can only return when we remain open to

God's encountering presence. This new book,

related to Root's critically acclaimed Ministry in a

Secular Age project, addresses the practical form

the church must take in a secular age. Root uses

two stories to frame the book: one about a church

whose building becomes a pub and the other

about Karl Barth. Root argues that Barth should

be understood as a pastor with a deep practical

theology that can help church leaders today. This

book pushes the church to be a waiting

community that recognizes that the only way for it

to find life is to stop seeing the church as the star

of its own story. Instead of resisting decline,

congregations must remain open to divine action. Root offers a rich vision for the church's future that moves away from an obsession with relevance and resources and toward the living God.
